DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Drawings

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2771

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abdul-Halim and Hashimoto et al. Claims 1, 3, 6 are the independent claims; claims 2, 4-5, 7-11 are the dependent claims.

In regard to claim 1, Abdul-Halim teaches a "a method for operating a personal digital assistant ..., storing ... relatable call numbers, choosing from a directory ..." as in claim 1. See Abstract which discusses pager (a type of a personal digital assistant) with directory entries.

Abdul-Halim does not teach "inputting a search key ..., comparing the search key ..., selecting a record ..., and utilizing the information ... to initiate ... electronic communication" as in claim 1.

Hashimoto et al. teaches "inputting a search key ..., comparing the search key ..., selecting a record ..., and utilizing the information ... to initiate ... electronic communication" as in claim 1. See Abstract which discusses a paging device with a search. See also column 1, lines 63 to column 2, lines 16, which discusses an electronic organizer (which is another type of a personal digital assistant).

Hashimoto et al. suggests to combine with a pager such as Abdul-Halim. - with the suggested purpose of having a pager to received from the paging device, thereby obtaining the benefit of user convenience. Such having both pager and receiver on a single device is convenient to the user. This benefit is commonly recognized in the communication arts. To wit, the common

Art Unit: 2771

telephone has both a speaker end that is held to the ear and a speaking end that is held to the mouth of the user. That such a combination be of a single device that has both the pager and paging device is discussed at column 1, lines 10-32 of Hashimoto et al.

Thus, it would have been obvious to those of ordinary skill in the art at the time of the claimed invention to combine Abdul-Halim and Hashimoto et al. for the benefit of user convenience.

In regard to claim 3, such search is discussed in Hashimoto et al. See Abstract which discusses sequential search.

In regard to claim 6, such display is discussed in Abdul-Halimn. See Abstract.

In regard to claim 2, such sequential search is suggested in Hashimoto et al. See Abstract which discusses sequential search.

In regard to claim 4, such routing of message is suggested in Hashimoto et al. See column 4, lines 18-37, which discusses messages being sent.

In regard to claim 5, such sending a message at various times is suggested in Hashimoto et al. See column 4, lines 18-37, which discusses messages being sent at varioustimes such as fixed messages and conditional messages.

In regard to claim 7, such QWERTY keyboard is well known in the art for the purpose of using established input means.

In regard to claim 8, such telephone keypad is well known in the art for the purpose of using established input means.

Art Unit: 2771

In regard to claim 9, such touch screen is well known in the art for the purpose of using established input means.

In regard to claim 10, such voice recognition is well known in the art for the purpose of using established input means.

In regard to claim 11, such email and internet hookup is well known in the art for the purpose of facilitating communication.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows searching and digital assistants.
